EXAMINER'S AMENDMENT

1. In view of the allowance of the generic claim 1, previously withdrawn dependent claims 16, 19, and 20 are now allowable.

- 2. The drawings filed on September 23, 2003 and February 21, 2006 are accepted by the Examiner.
- 3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Thomas E. Frantz on May 1, 2006.

4. The application has been amended as follows:

Claim 16, line 2 "Device" has been changed --device--,

Claim 18, lines 65-66 "their inner position" has been changed --said inner position--,

Claim 19, line 3 "said circular aperture" has been changed --said circular sleeve--,

Claim 19, line 5 "said circular aperture" has been changed -- said circular sleeve--,

Claim 20, line 2 "said circular aperture" has been changed --said circular sleeve--,

Claims 21 and 22 are canceled.

Application/Control Number: 10/669,488 Page 3

Art Unit: 3683

REASONS FOR ALLOWANCE

5. Claims 1-20 are allowed.

6. The following is an examiner's statement of reasons for allowance:

Kurz (US 6,513,988) disclosed, as shown fig. 1-2, a bearing device for a threaded spindle has a bearing housing with a clamping bushing, configured to receive a bearing part of the threaded spindle, for securing the bearing part by fluid-operated elements. The clamping bushing has a wall that is elastically deformable by a pressure medium. The wall and the bearing housing define an annular chamber configured to receive the pressure medium. A control unit is provided to control the pressure of the pressure medium and thus the clamping action of the clamping bushing.

However Kurz failed to disclose a piston pin moveable in a cylinder bore toward an inner position generating and transmitting pressure through the hydraulic liquid to expand the clamping bushing and an actuating piston engaging the piston pin and moving between inner and outer positions; and a biasing means moving the actuating piston and the piston pin toward the inner position to move the clamping bushing to clamp the rod and outer position to release the rod.

The aforementioned limitations and the arrangements thereof are not taught in the prior art. In light of the foregoing, the claims of present application are found to be patentable over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Application/Control Number: 10/669,488

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mariano Sy whose telephone number is 571-272-7126. The examiner can normally be reached on Mon.-Fri. from 8:30 A.M. to 2:30 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James McClellan, can be reached on 571-272-6786. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
